# GAME PAGES FOLDER

The diagram illustrates the structure and function of files within the 'GamePages' folder. It consists of four panels, each showing a file explorer view with annotations:

- Panel 1:** Shows the 'GamePages' folder containing files like `allGames.php`, `config.php`, `db.php`, `gameCSS2.css`, `gamePage.php`, `gamePageCSS.css`, `gamePageJS.js`, `noGameExist.php`, and `searchGamePage.php`.
  - Annotation 1:** `allGames.php` is the main PHP file of the page that contains all games in the Game Harbor. When a game will be uploaded, a new container will appear in this page. You can see all of the games in it.
  - Annotation 2:** `config.php` is the database connection file.
  - Annotation 3:** `db.php` is PDO Class.
  - Annotation 4:** `gameCSS2.css` is the style file for `GamePage.php` that works with game id which stored in Database.
- Panel 6:** Shows the same file explorer view.
  - Annotation 6:** `gamePageCSS.css` is the main style file for game showing page which name is `searchGamePage.php`.
  - Annotation 7:** `noGameExist.php` is the page that shows us the searched game doesn't exist. When user searches a game which is not in the website and database, `noGameExist.php` page appears.
- Panel 8:** Shows the same file explorer view.
  - Annotation 8:** `gamePage.php` is the page showing the game via game id. An old model for our project cause we started to use game name instead of game id in `searchGamePage.php`.
- Panel 9:** Shows the same file explorer view.
  - Annotation 9:** `searchGameExist.php` is the main show and finder page. When a game searched or clicked, the game search function above the main starts and finds the game details via game name.

# HOME PAGE FOLDER

# PROFILE PAGE FOLDER 1/2

The image displays a file explorer window showing the contents of a 'ProfilePage' folder. The folder contains several sub-folders and files. The files are listed in the left pane, and the right pane shows the contents of the selected folder. The files are:

- allUsers.php
- baseCSS.css
- database.php
- emailChange.php
- emailChangeSuccess.html
- loginPage.php
- loginSuccess.php
- logoutPage.php
- noUserExist.php
- passwordChange.php
- passwordChangeSuccess.html
- profilePageStyle.css
- publicProfilePage.php
- registerPage.html
- showProfilePage.php
- showProfilePageStyle.css
- signupProcess.php
- signupSuccess.html

13 numbered annotations are provided, explaining the function of various files:

1. The Page that contains all of the users in Game Harbor. When a new User signs up, a new user container appears in the page. When you click a user, the page directs you into showProfilePage.php
2. Base CSS file that used in emailChangeSuccess.html and passwordChangeSuccess.html
3. database.php is the database connection file for ProfilePage folder
4. emailChange.php is the E-Mail changing page for users. The function above the main in this PHP file allows us to update email address for users
5. Basic email change success page. It's just directs us to showProfilePage.php when we click the "go to your profile" inside the page.
6. Main Login Page for users. When users wants to sign in or sign up, they have to get into loginPage.php. There are "Log In/Register" options in it.
7. This page handles if the user is logged in or not. If not, redirects to loginPage.php, otherwise it starts session, regenerates an id for session and directs to index.php(Home Page)
8. When a user who logged in to the website, wants to logout and clicks the logout button that stands on showProfilePage.php, page directs to the logoutPage.php and this page destroys the current session for user and redirects us into loginPage.php
9. When a searched user doesn't exist in the Game Harbor, this page will appears and says "There isn't a user with this username"
10. When a user wants to change the password of that account, click the password change button. This page handles the password on the database and updates it if there is no problem such as "wrong current password".
11. Basic password change success page. It's just directs us to showProfilePage.php when we click the "go to your profile" inside the page.
12. The style file of the Profile page when users see their profile.
13. When a user logged in or not, searches a user via search bar and finds the user, this page shows of. User searching process starts above the main code as PHP. If finds the user, this page shows the user as public profile version, otherwise it directs us to noUserExist.php.

# PROFILE PAGE FOLDER 2/2

The diagram illustrates the structure of the ProfilePage folder, which contains various PHP files, CSS files, and HTML files. The files are organized into three main sections, each with a corresponding description and a number.

**Section 14:** Basic register page. If a user registers and fills all of the blanks such as name username email and password, it directs the user into signUpProcess.php.

**Section 17:** All processes about the sign up. It takes user datas via \$\_POST and creates a new row inside the database for the user.

**Section 15:** The profile show page for logged in users when they wants to look at their own Profile.

**Section 18:** Basic sign up success page. It's just directs us to loginPage.php when we click the "You can now log in" inside the page.

**Section 16:** Style file of the showProfilePage.php

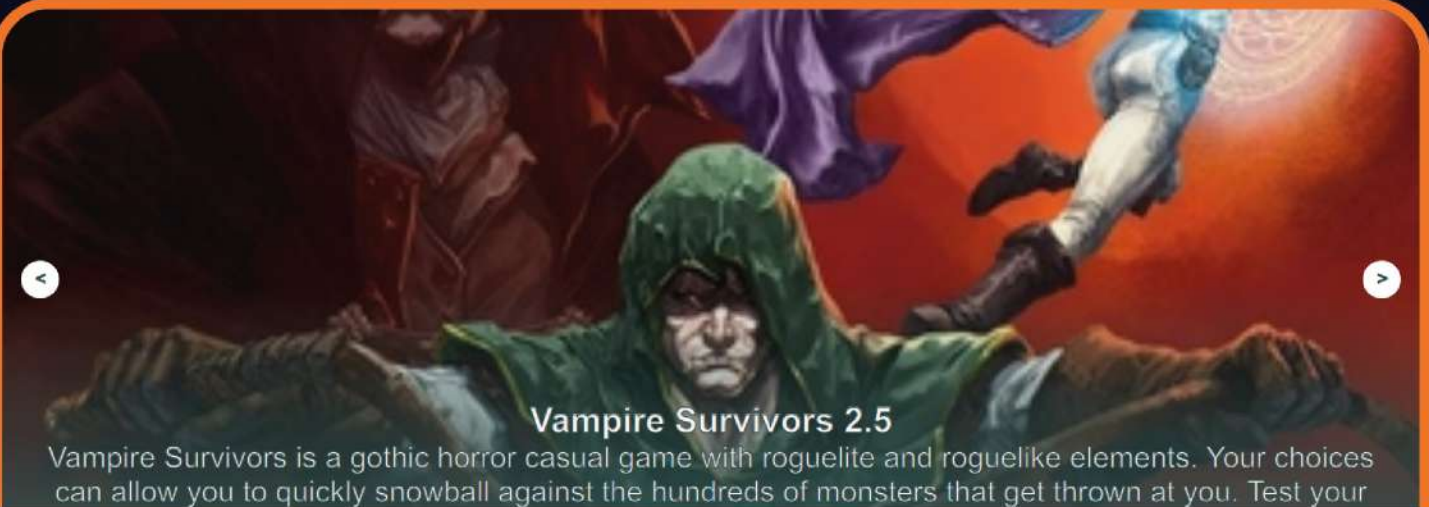

The files listed in the ProfilePage folder are:

- allUsers.php
- baseCSS.css
- database.php
- emailChange.php
- emailChangeSuccess.html
- loginPage.php
- loginSuccess.php
- logoutPage.php
- noUserExist.php
- passwordChange.php
- passwordChangeSuccess.h...
- profilePageStyle.css
- publicProfilePage.php
- registerPage.html
- showProfilePage.php
- showProfilePageStyle.css
- signUpProcess.php
- signUpSuccess.html

# UPLOAD GAMES FOLDER AND THE OTHERS

|   |  |   |
|---|--|---|
| <ul style="list-style-type: none"><li>UploadGames<ul style="list-style-type: none"><li>uploads</li><li>upload.php</li><li>uploadDB.php</li><li>uploadPage.php</li><li>uploadPageCSS.css</li></ul></li></ul> | All uploaded images goes database and "uploads" folder both.   | 1 |
| <ul style="list-style-type: none"><li>UploadGames<ul style="list-style-type: none"><li>uploads</li><li>upload.php</li><li>uploadDB.php</li><li>uploadPage.php</li><li>uploadPageCSS.css</li></ul></li></ul> | Uploading functions works here. It takes the name, description, image and username of the current user and adds a new row inside the game database with these data.          | 2 |
| <ul style="list-style-type: none"><li>UploadGames<ul style="list-style-type: none"><li>uploads</li><li>upload.php</li><li>uploadDB.php</li><li>uploadPage.php</li><li>uploadPageCSS.css</li></ul></li></ul> | Database connection for upload.php   | 3 |
| <ul style="list-style-type: none"><li>UploadGames<ul style="list-style-type: none"><li>uploads</li><li>upload.php</li><li>uploadDB.php</li><li>uploadPage.php</li><li>uploadPageCSS.css</li></ul></li></ul> | Game Uploading page of the Game Harbor. User gives game name, description, an image and the username of them. It directs these data into upload.php and all processes works. | 4 |
| <ul style="list-style-type: none"><li>UploadGames<ul style="list-style-type: none"><li>uploads</li><li>upload.php</li><li>uploadDB.php</li><li>uploadPage.php</li><li>uploadPageCSS.css</li></ul></li></ul> | Style file of the uploadPage.php   | 5 |
| <ul style="list-style-type: none"><li>contactPage.html</li><li>dynamic.js</li><li>favicon.ico</li></ul>   | Main contact page that contains email, phone number and instagram adress of the founders.  | 6 |
| <ul style="list-style-type: none"><li>contactPage.html</li><li>dynamic.js</li><li>favicon.ico</li></ul>   | The dynamic mouse scrolling script for all pages. When mouse scroll uses, header will appears and shows off with this script   | 7 |
